Disability Rating Standards  
Temporary Rule Promulgation  
For Individual Claims

**Statutory Authority:** ORS 656.726(4)

**Other Authority:** Oregon Administrative Rules, Chapter 137

**Statutes Implemented:** ORS 656.268(6); ORS 656.726(4)(f)(C)

**Need for the Temporary Rule(s):** The amendment is being adopted by temporary rule as provided by ORS 183.335(5) and (6). ORS 656.726(4)(f)(C) provides for the adoption of temporary rules to rate a worker's disability that is not addressed by the Standards. This rule is required to allow a worker's disability to be rated and thus provide the appropriate level of benefits.

In Workers' Compensation Division Claim (WCD) No. AAB-9871, the Standards in effect at the time of claim closure do not provide a rating for sacroiliac diastasis. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. BAD-2834, the Standards in effect at the time of claim closure do not provide for a rating for sexual dysfunction or loss of a gonad without total loss of hormone production. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. BAD-5597, the Standards in effect at the time of claim closure do not provide a rating for loss of motion when the injured joint is unable to reach neutral or zero position. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. E82-3081, the Standards in effect at the time of claim closure do not provide a rating for extensive arthritis in the ankle joint. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. EAB-6007, the Standards in effect at the time of claim closure do not provide for a rating for sexual

dysfunction. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. EAD-0843, the Standards in effect at the time of claim closure do not provide a rating for cold intolerance not caused by Raynaud's phenomenon or hypersensitivity. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. F98-7114, the Standards in effect at the time of claim closure do not provide a rating for loss of motion when the injured joint is unable to reach neutral or zero position. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. FAA-9841, the Standards in effect at the time of claim closure do not provide a rating for hypersensitivity in the fingers. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. G92-9449, the Standards in effect at the time of claim closure do not provide a rating for hypersensitivity in the leg. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. G94-9409, the Standards in effect at the time of claim closure do not provide a rating for loss of motion when the injured joint is unable to reach neutral or zero position. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. HAC-1026, the Standards in effect at the time of claim closure do not provide a rating for cold intolerance not caused by Raynaud's phenomenon. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

In WCD No. HAD-6042, the Standards in effect at the time of claim closure do not provide a rating for hypersensitivity in the little finger. OAR 436-035-0500, as adopted in this Order of Adoption of Temporary Rules, addresses the worker's disability found in this case and provides benefits for permanent disability resulting from the accepted condition.

Documents Relied Upon: ORS Chapter 656; OAR Chapter 436, Division 035, Disability Rating Standards; ORS Chapter 183; and Oregon Administrative Rules, chapter 137;

In WCD No. AAB-9871, the request to Promulgate Temporary Rule to Standards Review Committee memo dated December 13, 2002, Standards Review Committee recommendation dated April 7, 2003;

In WCD No. BAD-2834, the request to Promulgate Temporary Rule to Standards Review Committee memo dated November 20, 2002, Standards Review Committee recommendation dated April 7, 2003;

In WCD No. BAD-5597, the request to Promulgate Temporary Rule to Standards Review Committee memo dated January 31, 2003, Standards Review Committee recommendation dated April 7, 2003;

In WCD No. E82-3081, the request to Promulgate Temporary Rule to Standards Review Committee memo dated January 9, 2003, Standards Review Committee recommendation dated April 10, 2003;

In WCD No. EAB-6007, the request to Promulgate Temporary Rule to Standards Review Committee memo dated January 28, 2003, Standards Review Committee recommendation dated April 10, 2003;

**EXHIBIT "A"**  
**OREGON ADMINISTRATIVE RULES**  
**CHAPTER 436, DIVISION 035**

**436-035-0500 Temporary Rule Promulgation for Individual Claims**

(1) This rule applies to the rating of permanent disability under Chapter 656 in individual cases pursuant to ORS 656.726(4)(f)(C) which requires the director to stay the reconsideration proceeding and adopt temporary rules in cases where the director finds that the worker's impairment is not addressed in the disability standards.

(2) Temporary rules promulgated pursuant to ORS 656.726(4)(f)(C) will be incorporated by reference to the Workers' Compensation Division claim file number and will be applicable solely to the rating of that claim. The temporary rule will be effective upon filing with the Secretary of State and elapse 180 days thereafter in accordance with ORS 183.335(6)(a).

(3) Notice of adoption of temporary rules will be given by mailing a copy of the temporary rule to the affected parties and to others as provided in OAR 436-001-0000(3).

BAD-0991 Prior to becoming medically stationary in regards to his accepted conditions, this worker's claim qualified for closure. The worker was not medically stationary at the time of the medical arbiter examination. No major contributing cause denial had been issued and the parties did not consent to postpone the reconsideration proceeding. Similar to OAR 436-035-0007(5)(e), the Director assigns a value of zero for the unscheduled permanent partial disability award of 0% for the accepted low back strain. Notwithstanding OAR 436-035-0003 this rule applies only to WCD file no. BAD-0991.

DAC-2018 As a result of the accepted amputation of the distal phalanx of the right index finger, the worker experiences a loss of function due to mild hypersensitivity. The Director finds the loss of function, due to hypersensitivity in half the distal phalanx of the right index finger, similar to the loss of function experienced with less than normal sensation and assigns an impairment value of 8% of the right index finger. See OAR 436-035-0110(1). This value shall be combined with any other applicable impairment values for the involved right index finger. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file no. DAC-2018.

EAE-0535 This worker has residual moderate instability of the metacarpal phalangeal joint of the left thumb due to a fracture and ulnar collateral ligament dysfunction. This impairment is not addressed by the Standards. The Director assigns a total value of 4.0% for moderate metacarpal phalangeal joint instability of the left thumb. This value shall be combined with any other applicable impairment values for the left thumb. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file No. EAE-0535.

FAA-9983 The worker sustained a significant right ankle sprain resulting in the inability to reach neutral or zero ankle position. This results in a reduction in plantar flexion, equal to 25 degrees of retained plantar flexion. The Director assigns an impairment value of 5.5% for plantar flexion of the right ankle. See OAR 436-035-0190(8). This value shall be added to any other ankle or subtalar range of motion loss, then combined and apportioned with any other applicable impairment values, as appropriate. Notwithstanding OAR 436-035-0003 this rule applies only to WCD file no. FAA-9983.

DEPARTMENT OF CONSUMER AND BUSINESS SERVICES  
WORKERS' COMPENSATION DIVISION  
DISABILITY RATING STANDARDS, TEMPORARY RULE

G93-5860 The worker experiences a loss of function from temperature sensitivity, particularly cold intolerance resulting from burns and full thickness skin grafting on the dorsum of the fingers. The Director finds the loss of use and function of the fingers due to temperature sensitivity similar to the loss associated with a Class 3 vascular impairment and assigns an impairment value of 35% of the right index finger, 35% of the right middle finger, 35% of the right ring finger and 35% of the right little finger. See OAR 436-035-0110(6). These values shall be combined with any other applicable impairment values for each finger. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file no. G93-5860.

IAC-5199 The worker experiences a loss of function from cold intolerance due to the fracture and laceration resulting in a near amputation of the left little finger. The Director finds the loss of use and function of the left little finger due to cold intolerance similar to the loss associated with a Class 3 vascular impairment and assigns an impairment value of 35% of the left little finger. See OAR 436-035-0110(6). These values shall be combined with any other applicable impairment values for the left little finger. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file no. IAC-5199.

**AAB-9871 This worker has an accepted diastasis of the sacroiliac joint which is not addressed by the former Standards. The Director adopts the current value and assigns an impairment value of 10% for the accepted diastasis of the sacroiliac joint. This value shall be combined with any other applicable impairment values. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file No. AAB-9871.**

**BAD-2834 As a result of pain and atrophy of the right testis the worker underwent removal of the testicle. At the time of closure, the former rules did not address removal of the testicle without an absence or abnormally high level of hormones. The current Standards address the loss of the right testis (gonad) with an alteration in the ability to produce hormones. See OAR 436-035-0430(7). In this case, the Director assigns an impairment value of 3% for this worker's loss of a gonad and resulting sexual dysfunction, including altered hormone production. This impairment value is combined with any other ratable impairment under the former Standards. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file no. BAD-2834.**

**BAD-5597 This worker sustained a puncture injury of his right foot resulting in an inability to reach neutral or zero toe position at the MTP joint of the right 3rd and 4th toes. At the time of claim closure, the former Standards did not provide a value for the worker's loss of dorsiflexion. See former OAR 436-035-0160(5). The current Standards address this loss, therefore, the Director adopts the current value and assigns an impairment value of 10.5% for dorsiflexion of the right 3rd toe and 25% for dorsiflexion of the right 4th toe. Each toe value shall be added to any other loss of motion in the corresponding MTP joint of the 3rd and 4th toes. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file No. BAD-5597.**

**E82-3081 The worker sustained bilateral calcaneal fractures that went on to develop extensive arthritis associated with decreased strength. The worker has extensive arthritis in both the left and right feet. At the time of closure, the former rules did not address extensive arthritis in the foot. Therefore, in this case, the Director adopts the criteria as set forth in the current Standards pursuant to OAR 436-035-0200(5) and assigns a value of 5%**

WCD Admin. Order No. 03-054

DEPARTMENT OF CONSUMER AND BUSINESS SERVICES  
WORKERS' COMPENSATION DIVISION  
DISABILITY RATING STANDARDS, TEMPORARY RULE

---

for the right foot and 5% for the left foot. This value shall be combined with any other applicable impairment values. Notwithstanding OAR 436-035-0003 this rule applies only to WCD file no. E82-3081.

EAB-6007 This worker has sexual dysfunction as a direct medical sequelae of the accepted L1 burst fracture and resulting surgery. At the time of closure, the former Standards did not address sexual dysfunction. The current Standards address sexual dysfunction. See OAR 436-035-0420(10). The Director adopts the current impairment and assigns a value of 14% unscheduled disability for the sexual dysfunction. This value shall be combined with any other applicable unscheduled impairment values. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file No. EAB-6007.

EAD-0843 As a result of the accepted mallet avulsion fracture and subsequent surgery, the worker experiences a loss of function due to mild hypersensitivity and cold intolerance. At the time of closure, the former rules did not address cold intolerance due to vascular dysfunction that was not attributed to Raynaud's phenomenon. See former OAR 436-035-0110(6). The Director finds the loss of function, due to the cold intolerance in the left index finger, similar to the loss associated with a Class 3 vascular impairment under the current Standards and assigns an impairment value of 35% of the left index finger. The current rules address hypersensitivity but the former rules did not. The Director finds the loss of function, due to hypersensitivity in the left index finger, is equivalent to the loss of function experienced with less than normal sensation and assigns an impairment value of 20% of the left index finger, from the PIP joint to the tip. These values shall be combined with any other applicable impairment values for the involved left index finger. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file no. EAD-0843.

F98-7114 The worker sustained multiple comminuted fractures and a residual chronic infection, resulting in the inability to reach neutral or zero ankle position. This results in a reduction in plantar flexion, equal to 18 degrees of retained plantar flexion. At the time of claim closure, the former standards did not address the inability to reach neutral or zero ankle position. See former OAR 436-035-0190(8). The Director assigns an impairment value of 7.8% for plantar flexion of the left ankle. This value shall be added to any other ankle or subtalar range of motion loss, then combined with any other applicable impairment values, as appropriate. Notwithstanding OAR 436-035-0003 this rule applies only to WCD file no. F98-7114.

FAA-9841 As a result of the accepted C5-6, the worker experiences a loss of function due to moderate to severe hypersensitivity. At the time of closure, the former Standards did not address hypersensitivity. The Director finds the loss of function due to hypersensitivity in the right thumb, index and middle fingers, similar to a 44% impairment value which is in between the value for loss of "protective sensation" and "total loss of sensation". See OAR 436-035-0110(1)(c). The Director assigns an impairment value for hypersensitivity of 44% for loss in the right thumb, 44% for loss in the right index finger and 44% for loss in the right middle finger. These values shall be combined with any other applicable impairment values for the involved fingers and converted to a hand value, where appropriate. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file no. FAA-9841.

DEPARTMENT OF CONSUMER AND BUSINESS SERVICES  
WORKERS' COMPENSATION DIVISION  
DISABILITY RATING STANDARDS, TEMPORARY RULE

**G92-9449** Following a comminuted distal left femur fracture and traumatic occlusion of the popliteal artery resulting in multiple surgeries and extensive scarring, the worker experiences hypersensitivity in the left leg. The Director assigns a value of 5% for the hypersensitivity in the left leg. This value shall be combined with any other applicable scheduled impairment values. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file No. G92-9449.

**G94-9409** The worker sustained a right lower leg fracture with reflex sympathetic dystrophy resulting in the inability to reach neutral or zero ankle position. This results in a reduction in plantar flexion, equal to 33 degrees of retained plantar flexion. At the time of claim closure, the former standards did not address the inability to reach neutral or zero ankle position. See former OAR 436-035-0190(8). The Director assigns an impairment value of 2.8% for plantar flexion of the right ankle. This value shall be added to any other ankle or subtalar range of motion loss, then combined and apportioned with any other applicable impairment values, as appropriate. Notwithstanding OAR 436-035-0003 this rule applies only to WCD file no. G94-9409

**HAC-1026** As a result of the accepted crush injuries to the fingers causing vasospasm and reflex sympathetic dystrophy, the worker experiences a loss of function due to cold intolerance. At the time of closure, the former rules did not address cold intolerance due to vascular dysfunction that was not attributed to Raynaud's phenomenon. See former OAR 436-035-0110(6). The Director finds the loss of function, due to the cold intolerance in the left thumb and hand, attributable to vascular dysfunction associated with a Class 5 impairment under the current Standards and assigns an impairment value of 88% of the left hand. This value shall be combined with any other applicable impairment values for the involved left hand. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file no. HAC-1026.

**HAD-6042** Following a left little finger fracture and laceration, the worker experiences a loss of use due to moderate hypersensitivity. Hypersensitivity in the fingers was not addressed by the former Standards under which this claim was closed, but is addressed by the current rules. The worker has a moderate level of hypersensitivity, which equates to a "protective sensation loss" under the current rules. The Director adopts the current rule wording and assigns an impairment value of 19% for hypersensitivity in the distal phalanx of the left little finger. This value shall be combined with any other applicable impairment values for the involved left little finger. Notwithstanding OAR 436-035-0003, this rule applies only to WCD file No. HAD-6042.
