Subject: RE: Proposed amendment to workers' compensation rule, OAR 436-060-0025

Also for consideration, concerning both current and proposed language in OAR 436-060-0025:

The wording of (4)(b)(A) could be problematic:

'(A) The insurer may not include any gap in **[employment] earnings** of more than 14 days that was not anticipated in the wage earning agreement, when calculating the average earnings; and'

[emphasis added]

ComPro, Inc. assists with wage calculations on behalf of various insurers. As such, we see the gamut of payroll methods and records.

On occasion, a fair wage must be calculated in a manner which may not comply with a specific rule.

Such is the following example:

In June, a worker was injured and missed a month of work, followed by three weeks of light-duty.

In November, worker was again injured.

Although the gap was not anticipated in the wage earning agreement, to be fair the latter wage requires a gap during the period earnings were altered due to the earlier injury.

Summary –

The agency proposes to amend OAR 436-060-0025 to:

- Restore the method for determining the weekly wage for workers employed through a union hiring hall to the one in place before Jan. 1, 2017; for these workers, insurers must calculate the rate of compensation on the basis of a five-day work week at 40 hours a week, regardless of the number of days actually worked per week;
- Correct a typographical error to explain that the insurer may not include any gap in “earnings” (not “employment”) of more than 14 days that was not anticipated in the wage earning agreement, when calculating the average earnings; and
- Clarify that when a wage earning agreement has been changed due to reasons other than a pay raise, it is a new wage earning agreement.
